Not Configured Comment:

Enabled

Disabled

Supported on: At least Windows Server 2008 R2 or Windows 7

Options:

Exclude the last known good URL

Exclude the SCP object lookup

Exclude the root domain query based on your primary SMTP address

Exclude the query for the AutoDiscover domain

Exclude the HTTP redirect method

Exclude the SRV record query in DNS

Help:

This policy setting allows you to disable AutoDiscover.

If you enable this policy setting, you can select one or more of the following options to disable in the AutoDiscover feature.

"Exclude the last known good URL" – Outlook does not use the last known good Autodiscover URL.

"Exclude the SCP object lookup" – Outlook does not perform Active Directory queries for Service Connection Point (SCP) objects with Autodiscover information.

"Exclude the root domain query based on your primary SMTP address" - Outlook does not use the root domain of your primary SMTP address to locate the AutoDiscover service. For example, you select this option Outlook does not use the following URL: https://<smtp-address-domain>/autodiscover/autodiscover.xml.

"Exclude the query for the AutoDiscover domain" - Outlook does
